6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)

(S)

6.8.2 Nonrecurring Charges

(S)

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service.) Nonrecurring charges are applicable for installation of services, installation of features, installation of BSEs and for certain service rearrangements. In addition, an Access Order Charge may be applicable as specified in 5.3.1 (Access Order Charges). (S)

(A) Nonrecurring Charges for Installation of Service(1) Installation Charges

These nonrecurring charges apply to the installation of each feature group service (FGA, FGB, FGC and FGD), each basic serving arrangement (BSA-A, BSA-B, BSA-C and BSA-D), each DNAL, and each Switched Transport facility (Entrance Facility, Direct-Trunked Transport facility and Tandem-Switched Transport facility) as follows:

(S)

- For FGA and BSA-A, the per line installation charge is applicable on a first and additional basis.
- For trunk side feature groups and BSA services (FGB, FGC, FGD, BSA-B, BSA-C and BSA-D), the per trunk installation charge is applicable on a first and additional basis.
- For DNAL BSA, the per point of termination installation charge is applicable on a per channel, first and additional basis.
- For Switched Transport services (Entrance Facility, Direct-Trunked Transport and Tandem-Switched Transport), installation charges are applied on a first and additional basis by connection type.

ACCESS SERVICE

6. Switched Access Service (Cont'd) (T)6.8 Rate Regulations (Cont'd)6.8.2 Nonrecurring Charges (Cont'd)(A) Nonrecurring Charges for Installation of Service (Cont'd)(1) Installation Charges (Cont'd) (T)(a) Connection Type (Cont'd) (N)

When Tandem Switched Transport facilities are installed with the direct rating option, the nonrecurring charges will be those for Direct-Trunked Transport. The direct rating option is set forth in 6.8.3 (Monthly Recurring and Usage Rates). (N)

(b) First and Additional (T)

An installation charge is applicable on a first and additional line, trunk, DNAL termination, channel or connection type basis. If a customer orders multiple lines, trunks, DNAL terminations, channels or connection types on the same access order, the first line, trunk, DNAL termination, channel or connection type is assessed the "first" installation charge and each additional line, trunk, DNAL termination, channel or connection type is assessed the "additional" installation charge. (C)
(M)

If a FGC, FGD, BSA-C or BSA-D customer is adding capacity to the existing service and the order does not require the installation of an additional trunk(s), an installation charge does not apply. (M)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd) (T)6.8.2 Nonrecurring Charges (Cont'd) (T)(B) Nonrecurring Charges for Installation of Features (Cont'd)

(1) (Cont'd)

- (b) The nonrecurring charge for the following feature applies on a per end office basis. Whether direct routed or tandem routed, the first end office charge always applies. When the feature is requested for multiple end offices on the same access order, the additional end office charge always applies per end office.

Service Class Routing

- (c) When the following features are installed for a trunk group, the nonrecurring charge applies per trunk group.

Alternate Traffic Routing

- Multiple Traffic Routing Systems (for FGB, FGC and FGD)
- End Office Alternate Routing (for FGB and FGD)

Automatic Number Identification (for FGB, FGC, BSA-B and BSA-C)

Trunk Access Limitation

- (d) The nonrecurring charge for the following feature applies only when the feature is ordered subsequent to the CIC installation. When applicable, the nonrecurring charge is assessed on either a per tandem or a per end office basis. When tandem routed, only the tandem charge applies. When end office routed, only the end office charge applies.

Up to 7 Digits Outpulsing (for FGB, BSA-B)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.2 Nonrecurring Charges (Cont'd)(D) Nonrecurring Charges for Service Rearrangements (Cont'd)

- (3) Rearrangements of Switched Access features or BSEs will incur nonrecurring charges specific to the feature or BSE being rearranged.
- (4) Except as specified in 6.8.2(D)(7) and 6.8.2(D)(9) following, rearrangements of lines, trunks, channels or Switched Transport facilities will be treated as a discontinuance of the existing service and an installation of a new service and all applicable nonrecurring charges will apply as specified in 6.9 (Rates and Charges).
- (5) Rearrangements of the STP Port Termination utilized for CCS/SS7 Interconnection Service will be treated as a discontinuance of the existing service and an installation of a new service. The STP Port Termination Nonrecurring Charge will apply as specified in 23.4 (Rates and Charges). (S)(y)
- (6) Rearrangements to convert FGD or BSA-D trunks from the following arrangements will incur nonrecurring charge(s) specified in 6.9.2(E): (S)(x)
- Multifrequency address (MF) signaling to SS7 signaling.
 - SS7 signaling to MF signaling.
 - MF signaling to SS7 signaling with 64 CCC.
 - MF signaling to SS7 signaling with 64 CCC and Multiple 64 CCC.
 - SS7 signaling to SS7 signaling with 64 CCC.
 - SS7 signaling to SS7 signaling with 64 CCC and Multiple 64 CCC.
 - SS7 signaling with 64 CCC to SS7 signaling with 64 CCC and Multiple 64 CCC.
 - Subsequent rearrangement of Multiple 64 CCC. (S)(x)

(S)(x)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.3 Monthly Recurring and Usage Rates

Monthly rates (including fixed and per mile rates) are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided. For billing purposes, each month is considered to have thirty (30) days.

Usage rates for each line or trunk are rates that apply on a per unit basis (e.g., per call, per access minute or per access minute per mile) when a specific rate element is used. Usage charges are accumulated over a monthly period. (S)

Usage rates for FGD or BSA-D Service utilizing the Multiple 64 CCC feature will apply on a per unit basis. For Multiple 64 CCC, a unit represents a FGD or BSA-D trunk with 64 Kbps of bandwidth. The Multiple 64 CCC feature (n x 64 Kbps) is available in increments from 64 Kbps to 1536 Kbps bandwidth, where n may be from 1 to 24 and represents the incremental number of 64 Kbps of bandwidth per call. (S)

Rates and charges for Switched Access Service depend generally on its use by the customer, i.e., for MTS or WATS services, MTS-WATS equivalent services or other services (e.g., foreign exchange service); the feature group or basic serving arrangement and whether the service is provided in an equal access or a non-equal access end office.

When Local Switching (LS1 and LS2), Interconnection Charge and Information Surcharge usage rates are applicable, they are applied as either premium or non-premium rates.

Reissued material is filed under authority of Special Permission No. 94-625 of the F.C.C. and is deferred until July 1, 1994.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.3 Monthly Recurring and Usage Rates (Cont'd)

(A) Premium Rate Application

(1) Bundled and Unbundled Local Switching LS1

When Bundled or Unbundled Local Switching rates apply, LS1 rates are assessed to:

- FGA and BSA-A access minutes originating from or terminating to equal access end offices.
 - FGB and BSA-B access minutes originating from or terminating to equal access end offices (excluding originating 1+900 and ACIS access minutes from non-equal access end offices and terminating FGB and BSA-B access minutes to non-equal access end offices when such minutes are combined with tandem-routed FGD or BSA-D traffic).
- (C)

(This page filed under Transmittal No. 2405)

Issued: December 2, 1994

Effective: January 16, 1995

One Bell Center, St. Louis, Missouri 63101

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.3 Monthly Recurring and Usage Rates (Cont'd)(A) Premium Rate Application (Cont'd)(2) Bundled and Unbundled Local Switching LS2

When Bundled or Unbundled Local Switching rates apply, LS2 rates are assessed to:

- (a) FGA, BSA-A, FGB and BSA-B access minutes that terminate on WATS Access Line Service provided at WATS serving offices equipped with equal access capabilities;
- (b) FGC, FGD, BSA-C and BSA-D access minutes;
- (c) 1+900 and ACIS access minutes originating from non-equal access end offices when combined with tandem-routed FGD or BSA-D traffic; (C)
- (d) 800 NPAS access minutes; and
- (e) FGB and BSA-B access minutes terminating to a non-equal access end office when combined with tandem-routed FGD or BSA-D traffic.

(3) Interconnection Charge

When Interconnection Charge rates apply, premium rates are assessed consistent with the application of premium Local Switching rates.

(4) Information Surcharge

When Information Surcharge rates apply, premium rates are assessed consistent with the application of premium Local Switching rates.

(This page filed under Transmittal No. 2405)

Issued: December 2, 1994

Effective: January 16, 1995

One Bell Center, St. Louis, Missouri 63101

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.3 Monthly Recurring and Usage Rates (Cont'd)(B) Non-Premium Rate Application(1) Bundled and Unbundled Local Switching

When Bundled or Unbundled Local Switching rates apply, non-premium rates are assessed to:

- FGA and BSA-A access minutes originating from or terminating to non-equal access end offices and as set forth in (C) following.
- FGB and BSA-B access minutes originating from or terminating to non-equal access end offices (excluding originating 1+900 and ACIS access minutes and terminating FGB and BSA-B access minutes when such minutes are combined with tandem-routed FGD or BSA-D traffic). (C)

(2) Interconnection Charge

When Interconnection Charge rates apply, non-premium rates are assessed consistent with the application of non-premium Local Switching rates.

(3) Information Surcharge

When Information Surcharge rates apply, non-premium rates are assessed consistent with the application of non-premium Local Switching rates.

(This page filed under Transmittal No. 2405)

Issued: December 2, 1994

Effective: January 16, 1995

One Bell Center, St. Louis, Missouri 63101

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.3 Monthly Recurring and Usage Rates (Cont'd)(C) Equal Access Transition Plan (Cont'd)

(2) (Cont'd)

Non-Premium

The number of access minutes to be rated as non-premium is derived by subtracting the number of premium minutes from the total number of access minutes.

(3) Adjustment for FGD or BSA-D Premium Access Minutes

Where FGD or BSA-D Switched Access Service is provided to a customer in an end office where FGA or BSA-A premium access minutes have been determined in accordance with (2) preceding, the originating FGA or BSA-A premium access minutes will be adjusted in the following manner.

For each FGD or BSA-D access minute originating from that end office, the number of FGA and BSA-A originating premium access minutes determined in (2) preceding will be converted to non-premium access minutes on a one for one basis, but the number of minutes to be converted shall not exceed the total number of FGA or BSA-A premium access minutes originating from that end office. The customer will be billed for the revised number of FGA or BSA-A premium and non-premium access minutes. The following access minutes shall not be used to offset premium rates:

- 800 access minutes
- 900 Access Service minutes (T)
- MicroLink I Access Capability access minutes
- Access minutes originating from a Mobile End Office Connection
- ACIS originated access minutes (C)

(This page filed under Transmittal No. 2405)

Issued: December 2, 1994

Effective: January 16, 1995

One Bell Center, St. Louis, Missouri 63101

(T)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd) (T)6.8.3 Monthly Recurring and Usage Rates (Cont'd) (T)(G) Equal Access Recovery (T)

The Equal Access Recovery Charge is a monthly recurring charge which applies to each FGD and BSA-D trunk provided to the customer.

The number of end office switching transmission paths (FGD or BSA-D trunks) provided when the customer orders BHMCs will be determined as set forth in Section 6.7.4 (Determining the Number of Transmission Paths). (T)

(H) DNAL Termination (T)

A monthly rate applies only to the DNAL BSA for each termination requested by the customer. One DNAL Termination charge applies per each point of termination.

(I) DNAL Mileage (T)

The DNAL Mileage charge applies only to the DNAL BSA and is calculated according to mileage band. There are two rates that apply per band, i.e., a fixed monthly rate per mileage band and a monthly rate per band.

A fixed monthly rate applies, per mileage band, for each DNAL channel between the customer designated premises and the Telephone Company switch where the DNAL is terminated.

A monthly rate per mile applies to each airline mile between the serving wire center of the customer designated premises and the Telephone Company switch where the BSE requiring the DNAL is provided.

(This page filed under Transmittal No. 2295)

Issued: September 1, 1993

Effective: December 1, 1993

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.3 Monthly Recurring and Usage Rates (Cont'd)(J) 800 Number Portability Access Service (NPAS) (Cont'd)

The 800 NPAS rate elements will be billed to the customer utilizing FGD/BSA-D trunk side Switched Access Service for the delivery of 800 calls. Upon written notification by an exchange telephone company, the Telephone Company will render the 800 NPAS charges to the exchange telephone company, instead of the customer. The Telephone Company will bill the exchange telephone company for the appropriate 800 NPAS charges when an 800 NPAS call originates in the exchange telephone company's territory but uses the Telephone Company's SSP to execute the carrier identification function and delivery of the 800 call to the customer. (C)

(K) Multiplexing

A monthly rate applies to the multiplexing feature as follows:

- For the DS3 to DS1 multiplexer, a monthly rate always applies.
- For the DS1 to Voice Grade multiplexer, a monthly rate applies only when the multiplexer provides hubbing functions. Hubbing arrangements are described in 6.5.3 (Hubbing).

When the monthly rate is applicable, it is applied on a per multiplexer basis.

(L) Advanced Carrier Identification Service (ACIS) Carrier Identification Feature (CIF)

The Carrier Identification Feature (CIF) applies on a per call basis for the functionality used to identify the access customer to whom the PCS call is to be delivered. The CIF rate element applies to each PCS call requiring translation which is successfully delivered to the access customer.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)

(T)

6.8.4 Determining Chargeable Access Minutes

(T)

Chargeable access minutes are developed by the Telephone Company based upon recordings of customer traffic to end office or access tandem switches where recording capabilities exist. If such recordings are unavailable, the Telephone Company develops chargeable access minutes through the use of assumed minutes, recorded minutes which have been factored or imputed minutes.

(A) Determining Chargeable Access Minutes from Recordings

The recorded access minutes are the chargeable access minutes for the following types of usage:

- Originating calls over MTS/WATS-type FGA, FGB and FGD
- Originating calls over MTS/WATS type BSA-A, BSA-B and BSA-D
- Terminating calls over FGA, FGB, FGC and FGD
- Terminating calls over BSA-D, BSA-B, BSA-C and BSA-D

(This page filed under Transmittal No. 2295)

Issued: September 1, 1993

Effective: December 1, 1993

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd) (T)6.8.4 Determining Chargeable Access Minutes (Cont'd) (T)(A) Determining Chargeable Access Minutes from Recordings
(Cont'd)(1) Measuring Recorded Access Minutes (Cont'd)(d) FGD and BSA-D

When recording originating calls over FGD and BSA-D with multifrequency address signaling, usage measurement begins when the originating FGD or BSA-D entry switch receives the first wink supervisory signal forwarded from the customer's point of termination. The measurement of originating call usage over FGD or BSA-D ends when the originating FGD or BSA-D entry switch receives disconnect supervision from either the originating end user's end office (indicating that the originating end user has disconnected), or the customer's point of termination, whichever is recognized first by the entry switch.

For terminating calls over FGD and BSA-D with multifrequency address signaling, the measurement of access minutes begins when the terminating FGD or BSA-D entry switch receives answer supervision from the terminating end user's end office (indicating that the terminating end user has answered). The measurement of terminating call usage over FGD or BSA-D ends when the terminating FGD or BSA-D entry switch receives disconnect supervision from either the terminating end user's end office (indicating that the terminating end user has disconnected), or the customer's point of termination, whichever is recognized first by the entry switch.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd) (T)6.8.4 Determining Chargeable Access Minutes (Cont'd) (T)(A) Determining Chargeable Access Minutes from Recordings
(Cont'd)(1) Measuring Recorded Access Minutes (Cont'd)(d) FGD and BSA-D (Cont'd)

When recording originating calls over FGD and BSA-D with SS7 signaling, usage measurement begins with the transmission of the initial address message by the switch for direct trunk groups and with the receipt of an exit message by the switch for tandem trunk groups. The measurement of originating FGD and BSA-D call usage ends when the entry switch receives or sends a release message, whichever occurs first.

For terminating calls over FGD and BSA-D with SS7 signaling, the measurement of access minutes begins when the terminating recording switch receives answer supervision from the terminating end user. On directly routed trunk groups or on tandem routed trunk groups, the Telephone Company switch receives answer supervision and sends the indication to the customer in the form of an answer message. The measurement of terminating FGD and BSA-D call usage ends when the entry switch receives or sends a release message, whichever occurs first.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd) (T)6.8.5 Determining Switched Transport Mileage and Charges (Cont'd) (T)(A) Determining Switched Transport Mileage (Cont'd)(8) Alternate Traffic Routing (T)

When the Alternate Traffic Routing feature is provided with FGB, FGC and FGD or when the Alternate Traffic Routing BSE is provided with BSA-B, BSA-C or BSA-D to provide service to multiple customer switching systems, usage rated Switched Transport access minutes will be apportioned between the two transmission routes used to provide this feature. This apportionment will serve as the basis for Switched Transport mileage calculation.

For FGB, FGC, BSA-B and BSA-C the apportionment will be made using standard Telephone Company traffic engineering methodology as set forth in reference document Technical Reference PUB SR-EOP-000191 Trunk Traffic Engineering Concepts and Applications. The apportionment will be based on the last trunk CCS desired for the high usage group [as described in 6.6.2(B)(1)(b) and 6.6.5(B)(1)(b) and the relative capacity ordered to the end office when the feature or BSE is provided at an end office switch or to the subtending end offices when the feature or BSE is provided at an access tandem switch.

The apportionment for FGD and BSA-D to a tandem route will be based on the actual measured data. Originating FGD and BSA-D usage from the access tandem to multiple customer premises will be apportioned in the same manner described for FGB, FGC, BSA-B and BSA-C above.

6. Switched Access Service (Cont'd)

(T)

6.8 Rate Regulations (Cont'd)6.8.5 Determining Switched Transport Mileage and Charges (Cont'd)(A) Determining Switched Transport Mileage (Cont'd)

(T)

(9) DNAL BSA

(T)

Mileage for the DNAL BSA is calculated on the airline distance between the serving wire center of the customer's designated premises and the Telephone Company switch where the DNAL terminates.

(10) TRIS Connections

(T)

When FGD traffic originates from a Telecommunications Relay Interconnection Service, the V&H coordinates method is used to determine the mileage between the customers serving wire center and the access tandem where the Telecommunications Relay Interconnection Service is located.

(M)

(M)

(11) 800 NPAS

(T)

When 800 NPAS originates from an end office that routes its traffic through an intermediate access tandem or an OSS tandem to an SSP equipped access tandem, a representative NXX for the intermediate tandem or the OSS tandem will be used to determine the Switched Transport mileage for those end offices subtending the intermediate tandem or the OSS tandem. The V&H coordinates of the representative NXX will be based on the average distance from all end offices subtending the tandem to the SSP equipped access tandem.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.5 Determining Switched Transport Mileage and Charges (Cont'd)(A) Determining Switched Transport Mileage (Cont'd)(12) Mobile Connections

When FGA or BSA-A terminates to a Mobile End Office Connection or when FGB, FGC, FGD, BSA-B, BSA-C or BSA-D usage originates from or terminates to a Mobile End Office Connection or a Mobile Access Tandem Connection, the V&H Coordinate method is used to determine the mileage between the customer's serving wire center and the end office or access tandem switch where the Mobile Carrier's Mobile End Office Connection or Mobile Access Tandem Connection is located.

(13) Expanded Interconnection

When Expanded Interconnection replaces some of or all of the Telephone Company provided interoffice transport, mileage for Direct-Trunked Transport and Tandem-Switched Transport is calculated using the V&H coordinates method to determine mileage between the serving wire center and the Expanded Interconnection arrangement or between the Expanded Interconnection arrangement and the end office where calls are switched to originate or terminate. In calculating mileage, all other rules set forth in (A) (Determining Switched Transport Mileage) applies.

(B) Determining Switched Transport Mileage Charges

To determine the rate to be billed, compute the mileage, and apply the rate shown in 6.9 (Rates and Charges). If the calculation results in a fraction of a mile, always round up to the next whole mile before applying the rate.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)

(T)

6.8.8 Equal Access Conversion

(T)

The Telephone Company will provide written notification to all access customers of record within a particular LATA that an end office in that LATA is scheduled to be converted to an equal access end office. This notification will be sent, via certified U.S. Mail, at least six months in advance of the conversion date. The customer will have the choice of converting existing services to FGD or BSA-D at no charge, as described in 6.8.9 (Change of Feature Group Type or Basic Serving Arrangement), or retaining existing services. Premium rates will apply to the total access minutes beginning on the actual conversion date, whether the customer chooses to convert to FGD or BSA-D or to retain his existing services. (T)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)

(T)

6.8.9 Change of Feature Group Type or Basic Serving Arrangement

(T)

(A) Change of Feature Group

Changes from one type of feature group to another will be treated as a discontinuance of one type of service and a start of another. Nonrecurring charges will apply, with one exception. When a customer upgrades a FGA, FGB or FGC service to a FGD service, the nonrecurring charges for FGD Installation will not apply. At the time the customer upgrades from FGA, FGB or FGC to FGD, the customer may also change the facility used to provide the upgraded service at no additional charge. This change may include the connection type only (e.g., change from Voice Grade to DS1), the facility type only (e.g., change from Direct-Trunked Transport to Tandem-Switched Transport), or both. However, any features that are added or changed when the customer upgrades the service to FGD will incur the charge(s) applicable to that feature. When a customer upgrades a FGA, FGB or FGC service to FGD service, minimum period obligations will not change, i.e., the time elapsed in the existing minimum period obligations will be credited to the minimum period obligations for FGD service. For all other changes from one type of feature group to another, new minimum period obligations will be established.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)

(T)

6.8.14 Non-Access Charges

(T)

Rates and charges for services other than Switched Access Service, e.g., a customer's interLATA toll message service, may also be applicable when Switched Access Service is used in conjunction with these other services. Additional non-access charges will be billed on a separate account for:

- an operator surcharge, as set forth in the local exchange tariffs, for local operator assistance (0- and 0+) calls utilizing FGA or BSA-A;
- calls to certain community information services for which rates are applicable under Telephone Company exchange service tariffs, e.g., 976 (DIAL-IT) network services;
- calls from a FGA or BSA-A line or FGB, FGC, FGD, BSA-B, BSA-C or BSA-D trunk to another customer's service in accordance with that customer's applicable service rates when the Telephone Company performs the billing function for that customer;
- Custom Calling features utilized in conjunction with FGA or BSA-A;
- Billed Number Screening utilized in conjunction with FGA, FGB, BSA-A or BSA-B;
- intraLATA extensions utilized in conjunction with FGA or BSA-A;
- Remote Call Forwarding (Telebranch) utilized in conjunction with FGA or BSA-A.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.9 Rates and Charges (Cont'd)6.9.2 Switched Transport (Cont'd)(E) Trunk Conversion Charge

(M)

A nonrecurring charge will apply when a customer requests a conversion of a FGD or BSA-D trunk from the following arrangements:

(1) SS7 Signaling

- multifrequency address (MF) signaling to SS7 signaling.
- SS7 signaling to MF signaling.

	<u>USOC</u>	<u>First Trunk</u>	<u>Additional Trunk</u>
FGD, BSA-D	NRBGL	\$ 0.00	\$ 0.00

(2) 64 CCC

- MF signaling to SS7 signaling with 64 CCC.
- SS7 signaling to SS7 signaling with 64 CCC.

	<u>USOC</u>	<u>First Trunk</u>	<u>Additional Trunk</u>
FGD, BSA-D	NRBGM	\$ 0.00	\$ 0.00

(3) Multiple 64 CCC

- MF signaling to SS7 signaling with 64 CCC and Multiple 64 CCC.
- SS7 signaling to SS7 signaling with 64 CCC and Multiple 64 CCC.
- SS7 signaling with 64 CCC to SS7 signaling with 64 CCC and Multiple 64 CCC.
- Subsequent rearrangement of Multiple 64 CCC.

	<u>USOC</u>	<u>First Trunk</u>	<u>Additional Trunk</u>
FGD, BSA-D	NRBGN	\$ 0.00	\$ 0.00
